
Tune middle concert Bb first, then move to other pitches. Do not adjust or bend. This is for you and I to know the tuning tendancies of your instrument.

Get with a **partner** and a tuner and have them fill out the chart. Do not look at the tuner when you play, just play normally with a good tone.

ALTERNATE FINGERINGS: Write down the fingering in the box. (ex: for C, use 1&3 and 1) Please tune all fingerings you know for each note.
